Suggestions for further reading to extend and deepen knowledge and add context.

Topic 4

www.worldwatercouncil.org

The World Water Council promotes awareness, builds political commitment and triggers action on critical water issues.

www.wateraid.org/uk

WaterAid is an international organisation that aims to improve access to safe water, sanitation and hygiene worldwide.

<http://umich.edu/search/keywords/water%2520pollution>

Water pollution articles on the University of Michigan website – useful for background, homework or project work.

www.nrdc.org/oceans/plastic-ocean

Information about water pollution caused by plastics (on the US Natural Resources Defense Council website) – useful for background, homework or project work.

Christensen, V. and Maclean, J. (2010) *Ecosystem Approaches to Fisheries: A Global Perspective*, CUP

An overview of the management of fisheries using an ecosystem-based approach. It covers global biodiversity and the human impact on marine systems. There are contributions from scientists, fishery managers and conservationists.

Southward, A. (1978) 'Marine Life and the Amoco Cadiz', *New Scientist*, Vol. 79 (July, 1110), p. 174

Southward describes how measures used by French biologists reduced the ecological damage caused by the oil spillage from the Amoco Cadiz wreck.

Stickney, R.R. (2009) *Aquaculture an introductory text*, 2nd edn, CABI Publishing

A readable account of aquaculture, covering sustainability, culturing systems, hatcheries and feeding methods. It provides more detail than the course requires, but is a useful source of reference material.
